14/16 **While working on this font in Winter/Spring 2024, I came across a message that scared the hell out of me. Nicobar Island in the Indian Ocean should be engulfed in development driven by sheer greed and violence. It's become quite common to read news we tend not to believe, but this one doesn't come from the realm of horror-inspired dystopian fantasy; I have known Indians quite well for many years and I have seen virgin beaches destroyed by tourist bus parking and infrastructure, I have seen a Brahmin temple in Gujarat being demolished for a cable car station, and a new multi-storey concrete pilgrim hostel stuck right on top of a 16th century temple, I have seen tribal settlements destroyed for the highway, all in the name of "development". 10/13 **Při práci na tomto fontu v zimě a na jaře 2024 jsem narazil na zprávu, která mě hodně vyděsila. Ostrov Nicobar v Indickém oceánu by měl být pohlcen rozvojem vedeným čistou chamtivostí a násilím. Stalo se poměrně obvyklým, že čteme zprávy, kterým máme tendenci nevěřit, ale tyto nepocházejí z říše hororem inspirované dystopické fantasy; Zním Indy po mnoho let docela dobře a viděl jsem panenské pláže zničené parkovišti pro turistické autobusy a infrastrukturu, viděl jsem, jak se bráhmanský chrám v Gudžarátu bourá kvůli stanici lanovky, nová vícepatrová betonová poutní ubytovna nalepená přímo na chrám ze 16. století, viděl jsem kmenové osady zničené kvůli dálnici, vše ve jménu „rozvoje“. Tito lidé se nemohou bránit a jsou obětí státního násilí. Podobají se vzácným druhům odsouzeným k vyhynutí. Shompen je nedotčený kmen na Velkém Nicobarském ostrově, kterému věnuji toto písmo. Nemohu udělat víc než to, ale musím udělat alespoň něco. Také jsem podepsal petici na <https://www.survivalinternational.org/tribes/shompen>. Pokud má**

8/10 While working on this font in Winter/Spring 2024, I came across a message that scared the hell out of me. Nicobar Island in the Indian Ocean should be engulfed in development driven by sheer greed and violence. It's become quite common to read news we tend not to believe, but this one doesn't come from the realm of horror-inspired dystopian fantasy; I have known Indians quite well for many years and I have seen virgin beaches destroyed by tourist bus parking and infrastructure, I have seen a Brahmin temple in Gujarat being demolished for a cable car station, and a new multi-storey concrete pilgrim hostel stuck right on top of a 16th century temple, I have seen tribal settlements destroyed for the highway, all in the name of "development". These poor people cannot defend themselves and are victims of state violence. They resemble rare species doomed to extinction. Shompen is a pristine tribe in Great Nicobar Island to whom I dedicate this font. I can't do more than that, but I have to do at least something. I also signed the petition at <https://www.survivalinternational.org/tribes/shompen>. If anyone has a better idea, please let me know. My heart bleeds for pure nature and

10/13 *Při práci na tomto fontu v zimě a na jaře 2024 jsem narazil na zprávu, která mě hodně vyděsila. Ostrov Nicobar v Indickém oceánu by měl být pohlcen rozvojem vedeným čistou chamtivostí a násilím. Stalo se poměrně obvyklým, že čteme zprávy, kterým máme tendenci nevěřit, ale tyto nepocházejí z říše hororem inspirované dystopické fantasy; Zním Indy po mnoho let docela dobře a viděl jsem panenské pláže zničené parkovišti pro turistické autobusy a infrastrukturu, viděl jsem, jak se bráhmanský chrám v Gudžarátu bourá kvůli stanici lanovky, nová vícepatrová betonová poutní ubytovna nalepená přímo na chrám ze 16. století, viděl jsem kmenové osady zničené kvůli dálnici, vše ve jménu „rozvoje“.
